

Economist | Financial Analyst | Technical Project Manager

kazimirofs@gmail.com

Professional Summary

Economist and business manager with 10 years of experience in investment projects, financial planning, procurement and contract negotiations in both government and private sectors.

Managed high-value commercial projects, coordinated international suppliers, supervised procurement processes and worked with major industrial and energy companies.

In recent years transitioned into software engineering, where I developed strong analytical, automation and data-driven decision-making skills. Now looking to apply both business and technical experience in finance, economics or business analysis.

Employment History

Government & Private Sector, Belarus, Jul 2007 to May 2017

Economist / Investment Project Manager

Managed investment, procurement and commercial projects from initial planning through execution and post-project evaluation. Prepared financial models, investment calculations, cost analysis and profitability assessments to support management decision-making.

Planned project budgets, monitored expenses and ensured efficient allocation of financial resources.

Coordinated procurement processes, supplier selection and commercial negotiations with domestic and international partners.

Managed contract preparation, negotiations and execution with government organizations and private enterprises.

Organized international procurement and logistics for industrial equipment and coordinated cross-border suppliers.

Worked closely with finance, operations and executive management to support strategic planning and business development initiatives.

Prepared management reports, business presentations and analytical materials for investment and commercial projects.

Achievements:

Managed procurement of sports equipment for Olympic teams.

Coordinated international supply of industrial aircraft engines from China.

Participated in investment projects involving major energy companies.

Successfully negotiated high-value commercial contracts with government and private organizations.

Healthcare Industry, Israel & Belarus, Jun 2017 to Present

Senior Software Engineer / Technical Lead

Led software development projects from planning through successful delivery.

Planned engineering capacity, estimated project timelines and coordinated resource allocation across multiple parallel initiatives.

Coordinated cross-functional teams including backend, frontend, DevOps and QA engineers across multiple countries.

Collaborated with product managers, operations, customer success and executive leadership to deliver business objectives.

Collaborated with business stakeholders to balance delivery timelines, project costs and technical requirements.

Led optimization initiatives that reduced infrastructure and operational costs while improving system performance and scalability.

Analyzed business metrics and large datasets to support product improvements and management decision-making.

Developed reporting and analytics solutions to support business decisions and monitor key performance indicators.

Worked in healthcare technology, developing systems supporting medical organizations and healthcare professionals.

Mentored engineers, coordinated project execution and ensured high-quality delivery.

Led technical decision-making with focus on long-term maintainability, business value and cost efficiency.

Education

Sept 2006 to May 2010

Bachelor's degree from Belorussian university (Economics and Management), graduated with honors.
